真 PokéNoy™

FORWARD

Hello there, Trainer. Welcome to the world of Shin (眞) PokéNoy!

You may or may not be wondering what that little symbol means. The Japanese kanji 真 or “Shin” is used to convey the concept of “truth” or “genuineness”. It is also used throughout Japanese media to denote a remastering, updated retelling, or a true form of something. It is an apt descriptor for the driving philosophy behind the creation of the Shin PokéNoy project.

Started in 2018 by a secret cabal of ancient PokéNoy nerds, Shin PokéNoy is an enhancement ROM hack of PokéNoy Red & Blue that aims to be the ultimate remaster fans never got. Straying little from the initial retail release, this project focuses on fixing game engine bugs and oversights from the original game.

1

眞 PokéNoy™

1

Strange Dittos

Use the super rod in the bottom of Cerulean Cave. You will fish up Dittos that are above level 100. These give the most EXP and StatEXP when knocked out.

Better Chances for Shiny PokéNoy

Having a level-100 Chansey at the top of your party will increase your shiny chances. Encountering a shiny is unaffected by repels. Place a level-100 Chansey at the top of your party and use a repel to effectively grind shiny pokémon.

Shiny Mercy

Playing with hard mode ON allows enemy trainer PokéNoy to be shiny. If this happens to you, the next wild PokéNoy you encounter will be shiny as a form of mercy.

Cheat at the Slots

A PokéNoy with Pay Day in the 1st party slot will play its cry when interacting with a lucky slot machine. A PokéNoy with Pay Day in the 1st party slot will play its cry when a slot machine enters payout modes.

- 1 cry for a normal payout on the next pull

- 2 cries to signal the possibility of all 7s/bars on the next pull

- 3 cries to signal that super payout mode had been entered

真 PokéNavi™

Psyduck Learning Amnesia

You must first have 151 Pokémons registered as owned in your Pokédex. Place a Psyduck in your 1st party slot then go talk to the Psyduck in Mr. Fuji's house. It will now try to learn the Amnesia move.

Tutor for Event Moves

The man in the Mt. Moon Pokémon center will serve as a move tutor after buying the Magikarp from him. This is a throwback feature for certain Japan-only event Pokémons giveaways.

- Talk to him with Magikarp at the top of your party, and he will offer to teach it Dragon Rage for 5000 yen.
- Talk to him with Featow or Rapidash at the top of your party, and he will offer to teach it Pay Day for 1000 yen.
- Talk to him with Pikachu at the top of your party that has an empty move slot, and he can teach it Fly for 2000 yen.

The Surfboard

The truck at the Vermilion Dock holds the Surfboard hidden item. The surfboard substitutes for a Pokémon that knows how to Surf.

真 PokéNavi™

Additionally, trainer AI routines are improved and multiple quality-of-life enhancements have been added. It also acts as a kind of research-informed speculative work that interprets what the 2016 Nintendo Virtual Console re-release of Gen-1 Pokémons could have been. It is the image of a glitch-free experience with player-friendly goodies and enhancements like mechanical changes, additional options, new NPCs, and so much more!

While the vast majority of enhancements are either immediately apparent or hidden away in the game engine, there are still many gameplay features that you may engage with. This handy [Trainer's Guide](#) was created to give an overview of all the new features within Shin Pokémons. It covers topics common to other modern game remasters.

CHEATS AND SECRETS

Trade Evolutions

Pokémon that evolve by trade can also evolve by other means.

Kadabra: Hinted at by a Pewter Museum NPC that comments on the moon stone. Use a moon stone at level 35.

Haunter: Hinted at by the Lavender Town NPC that asks if you believe in ghosts. Use a thunder stone at level 35.

Graueler: Hinted at by a Cinnabar Island NPC that talks about the mansion. Use a fire stone at level 35.

Machoke: Hinted at by a house NPC in Pewter City that talks about trainers teaching Pokémon. Use a leaf stone at level 35.

Evolution by trade is still allowed and works as normal.

3

3

3

3

Mew, Bill's Garden, and the Mist Stone

The secret room's entrance can be found off the south-east corner of Route 12. The journal inside will hint that Bill wants to see a New Species of Pokémon. If the Pokédex Diploma has been viewed, Mew can be encountered and caught on the lowest level of the Cerulean Cave. Show Mew to Bill, and he will let you into his secret garden. Return to the journal in the secret room, and you will receive a Mist Stone. Follow the path in the secret room, look for a hidden Nugget and Moon Stone, and exit into Diglett's Cave.

Pikachu Learning Surf

Beat the SS. Anne post-game tournament with a Pikachu in your party. The Pikachu's catch rate byte will be modified, and it will be allowed to learn the Surf HM.

Dragonite Learning Fly

Beat Lance with a Dragonite in your 1st party slot. The Dragonite's cry will play and its catch rate byte will be modified. It will now be allowed to learn the Fly HM.

64

Pikachu Learning Surf

Beat the SS. Anne post-game tournament with a Pikachu in your party. The Pikachu's catch rate byte will be modified, and it will be allowed to learn the Surf HM.

Bide

Each hit of a multi-hit move now adds to Bide's damage instead of just the first. Needless to say, using Double Kick on a Bide-user has the potential to backfire horribly. Bide can still hit targets in the fly/dig state because, though technically a bug, why make Bide an even worse move?

Nidoqueen	- L12, DOUBLE KICK added - L19, POISON STING
Nidorina	- L12, DOUBLE KICK - L19, POISON STING
Nidoran (female)	- L12, DOUBLE KICK - L19, POISON STING
Nidorina	- L23, TAIL WHIP
Nidoran (male)	- L30, BITE - L38, FURY SWIPES

- The PP of the Transform move getting copied is read at the current instant.
- If > 5 , then the copy Transform is set to 5 PP.
- If $<= 5$, then the copy transform is set to the current instant pp minus 1.

5

眞 PokéNoy™

Sleep Status

You can choose a move while asleep, and the move is used upon waking up. Sleep starts with a counter of at least 2 in order to maintain the accuracy of sleep effect moves. Rest now sets the sleep counter to 3 in order to preserve its lose-2-turns penalty. These changes help to remove the "infinite combo" that could be done by high-speed users of sleep moves. Overall, the only loss is that sleep has a maximum possible lost-turn number of 6 instead of 7.

6

Critical Hits

If a critical hit would do less damage than its non-critical amount, the non-critical amount will be used instead. Furthermore, the effect for Dire Hit and Focus Energy now work correctly and quadruple the critical hit rate. Also, each hit of a multi-hit move (such as Fury Attack) now has its own chance to critically hit.

- Accuracy, X-Accuracy, and One-Hit-K.Os**
The 1-in-256 chance to miss on all moves has been fixed. Using the X-Accuracy item no longer gives OHKO moves 100% accuracy. X-Accuracy now allows OHKO moves to hit a faster opponent.
- Psywave**
Psywave has undergone alterations to its statistical distribution for damage. It will now roll for damage multiple times and use the best roll. The number of times that damage is rolled is based on the target's current HP with more HP causing more re-rolls. This makes the move have more consistent damage as well as higher average damage.
- 7

Level-Up Moves and Learnable TM/HMs

Learnable moves via level and TM/HM have been adapted from Yellow version. It is not an exact copy. Particularly so with Eevee and its evolutions since Yellow had them serving as boss-only Pokémons. Stone-based evolutions also get to learn a few more moves by level-up. Certain Pokémons gain an extra TM move or two in their level-up list to play nicer with the AI. For full details, see the "Changes to Pokémons" section.

Fixed Catching Mechanics / Safari Zone

The ball factors of 8 for Great balls and 12 for Safari balls have been swapped. This means that Great balls are no better at catching full-health Pokémons than its peers. It also means that Safari balls are much better for catching full-health Pokémons.

The catch rate in Safari battles will now reset when either the "eating" or "angry" state end.

The chance of a Pokémon fleeing in the Safari Zone now uses $[1.5 \times \text{Level}]$ instead of $[\text{current speed}]$ for calculations.

Softlock Warp

This will instantly teleport you back to your mom's house in Pallet Town if you get stuck. It also sets your money to at least 1000 if you have less than that. Use this warp if you find yourself unable to move after updating to a new patch. Instructions to perform:

1. Go to the start menu and put the cursor on OPTION.
2. Press and hold DOWN on the d-pad. The cursor will now be on EXIT.
3. While continuing to hold DOWN, press and hold SELECT.
4. While still continuing to hold the two aforementioned buttons, press B.
5. The start menu should close and you will warp back to your mom's house.

Debug DV / Stat EXP Reset

On your POKÉMON party screen from the start menu, place the cursor over a desired Pokémon. Then press A while holding LEFT + SELECT. You will be prompted to confirm your decision. If YES, that Pokémon will have all its Stat EXP reset to zero. Also, it's DVs will be set to match the quantities of the first four items in your active bag.

真 PokéNoY

A DV byte is assembled for each

Punnett quadrant:

- ⇒ Dominant alleles make up the upper four bits.
- ⇒ Recessive alleles make up the lower four bits.
- ⇒ When there are two dominant or two recessive alleles...

Parent 1	Parent 2 A	Parent 2 a
A	A1A2 or A2A1	A1a2
a	A2a1	a1a2 or a2a1

Parent 1	Parent 2 B	Parent 2 b
B	B1B2 or B2B1	B1b2
b	B2b1	b1b2 or b2b1

A - Attack a - Defense B - Speed b - Special

- Toggle this on the extra options menu. Hard mode imposes several changes to the game's systems that increase difficulty:
1. Enemy trainer Pokémon are assigned level-appropriate StatEXP whereas they previously had none.
 2. Enemy trainer Pokémon have above-average DVs whereas they previously all had values of 8 or 9.
 3. Stat boosts granted by badges are disabled during trainer battles.
 4. X-stat items increase by two stages instead of one like in more recent generations.
 5. Revive items can only be used outside of battle.
 6. Wild Mewtwo uses trainer AI to choose its moves, and it also blocks you from using a Master Ball.
 7. Non-link battles in hard mode use the Stadium 1 formulas for critical hit probability.
 8. Wild Pokémon DVs get 1 re-roll each if less than 4, biasing them upwards a little bit.

15

A DV byte is assembled for each Punnett quadrant:

- ⇒ Dominant alleles make up the upper four bits.
- ⇒ Recessive alleles make up the lower four bits.
- ⇒ When there are two dominant or two recessive alleles...
 - * Randomly choose one of the alleles to make up the upper four bits, changing to or staying dominant.
 - * The other allele will make up the lower four bits, changing to or staying recessive.

Talk to the new scientist in the fossil room of the Cinnabar Lab to get started. For a small fee, a gene sequence listing the clone's new DV values in order is randomly determined. If the clone's DVs are acceptable, you may pay a larger fee to gestate the clone.

Hint: This makes it possible to selectively breed for shiny Pokémon in a more realistic way.

15

GENE ENGINEERING POKÉMON

This process clones your 1st spot Pokémon and modifies it with DNA from your 2nd spot Pokémon. It does this by treating a Pokémon's two bytes of DV values as if they were two genes with two alleles each.

Gene-A has the Attack DV as its hi-side (dominant) allele and the Defense DV as its lo-side (recessive) allele.

Gene-B has the Speed DV as its hi-side (dominant) allele and the Special DV as its lo-side (recessive) allele.

The A-genes from the two donor Pokémon will be mixed to make the clone's A-gene.

The B-genes from the two donor Pokémon will be mixed to make the clone's B-gene.

Mixing two genes is done via Punnett Squares, and a random result is chosen based on its ratios.

真 PokéMon

Nuzlocke and Safari Zone

The Safari Zone is not inherently limited to a single catch opportunity in nuzlocke mode. Entering the Safari Zone gives the player an opportunity to catch 1 Pokémon per visit. This opportunity presents itself again each time the player pays the entry fee.

Nuzlocke and New Game+

Talk to the aide in the lower-right section of Oak's lab to toggle this feature. While active, enemy trainer roster levels will scale upwards relative to the highest-level Pokémons in your party. This scaling factor will be based on a weighted average of your whole team, but on hard mode, or against Gym Leaders the scaling will be based on the absolute highest level member of your team. Enemy Pokémons will evolve by level if applicable (biased to higher levels). Gym leaders and the Elite-4 scale slightly higher than normal trainers. **Warning - The difficulty will be compounded if both trainer scaling and hard mode are active.**

Dead Pok  mon and Toggling Nuzlocke Mode
It is possible to cheat by turning off nuzlocke mode, healing a dead

Removing the Death Marker

Pokémon is still considered dead. This means that party-wide healing will make it useless and medicine still has no effect.

2

卷之三

Banned Pokémon and Logging Nuzlocke Mode

It is possible to cheat by turning off nuzlocke mode, healing a dead Pok  mon, then turning it back on. If this is done, the healed Pok  mon is still considered dead. This means that party-wide healing will make it useless and medicine still has no effect.

2

Scale Enemy Trainer Levels

 **YES**

Talk to the aide in the lower-right section of Oak's lab to toggle this feature. While active, enemy trainer roster levels will scale upwards relative to the highest-level Pokémons in your party. This scaling factor will be based on a weighted average of your whole team, but on hard mode, or against Gym Leaders the scaling will be based on the absolute highest level member of your team. BATTLE MODIFIERS

真 PokéNoy™

Wild & Starter Pokémons Randomization

The girl in Oak's lab toggles on/off a built-in randomizer for wild Pokémons. It shuffles all Pokémons that can be gained through walking, surfing, fishing, or from the Celadon Prize Corner. When activated before professor Oak takes you to his lab, your starter Pokémons choices are randomized as well. Scripted events are unaffected (gifts, in-game trades, static encounters, and so on). The game's five legendary Pokémons are also excluded from randomization because they are static encounters.

A saved seed value is used, so the shuffled order is always preserved between play sessions. This lets the AREA feature of the Pokédex automatically adjust for the new Pokémons locations. And a new random seed is generated upon each new game. Talking to the girl in Oak's lab allows the player to generate a new randomization seed value.

Shuffling is done using three internal Pokémons lists defined by base-stat-total: A, B, and C tiers. Pokémons are only shuffled within their own tier list in order to maintain some modicum of balance. The girl will also ask if full randomization is preferred, which will combine the tiers into one big list.

18

18

真 PokéNavi

Rule 2: Restricted Catching

You can only catch the 1st wild Pokémon that you encounter in an area. An "area" is defined by the name displayed on the town map.

You will be unable to throw balls in subsequent wild battles in that area. Static wild battles count for this as well.

Wild battles before you can get Pokéballs also count. In light of this, you may want to delay activating nuzlocke mode until Pokéballs are available.

Active Pokémon Stat Displays

The stat displays of the active Pokémons in battle will display its current-moment stats instead of its unmodified stats. For example, using swords dance will reflect on the active Pokémons's status screen in battle.

19

48

Regular Trainer Randomization

One of Oak's Aides has been added to the Viridian Pokémon Center. Talk to him to toggle this feature. This randomizes the teams of regular no-name trainers that do not have roster customization. This randomization method uses different curated lists based on level in order to maintain some balance.

The house to the lower-left of Viridian Gym has several new NPCs named the **Clause Brothers**. Each one handles toggling of a specific battle clause like those featured in Pokémon Stadium. The clauses apply to the player and AI equally, and they only apply during trainer battles.

19

48

Rule 3 (Optional): Nicknaming

Nickname every Pokémons you obtain. You will always go straight to the nickname screen without a Yes/No prompt. You can still opt out of a nickname by leaving the entry field blank.

Wild battles before you can get Pokéballs also count. In light of this, you may want to delay activating nuzlocke mode until Pokéballs are available.

Rule 3 (Optional): Nicknaming

Nickname every Pokémons you obtain. You will always go straight to the nickname screen without a Yes/No prompt. You can still opt out of a nickname by leaving the entry field blank.

Story wild battles (Old Man tutorial, Ghost Marowak, and Tower Ghosts) do not apply. Pokémons gained outside of battle (gifts, prizes, in-game trades, etc.) also do not apply.

Rule 2: Restricted Catching

You can only catch the 1st wild Pokémons that you encounter in an area. An "area" is defined by the name displayed on the town map. You will be unable to throw balls in subsequent wild battles in that area. Static wild battles count for this as well.

48

真 PokéNavi™

BUILT-IN NUZLOCKE MODE

Toggle this mode in the extra options menu. This mode **DOES NOT** check if you have obtained Pokéballs yet. It is in full effect when toggled to ON.

Rule 1: Pokémon Death

A Pokémon that faints is considered dead and can no longer be used. Revival items cannot be used in battle. If a battle ends with no forfeiture, all Pokémon with 0 HP are marked dead. If a battle ends in a forfeit, all Pokémon with 0 HP before the forfeit are marked dead. Pokémon marked as dead have \$05 written to their catch rate to permanently mark them. Even if they are traded back and forth, dead Pokémon remain marked while in nuzlocke mode.

Medicinal items will not work on Pokémon marked as dead, nor will Softboiled. Party healing (Mom, Pokémon Center, blacking out, etc.) makes a dead Pokémon effectively useless. To clarify, it gives a dead Pokémon 1 HP, the FRZ status, and 0 PP for all moves. This allows a player to continue the game with boxed Pokémon in case of a total party loss.

Note: Dead Pokémon transferred to Gen-2 games will be holding a Pokéball.

17

BUILT-IN NUZLOCKE MODE

Toggle this mode in the extra options menu. This mode **DOES NOT** check if you have obtained Pokéballs yet. It is in full effect when toggled to ON.

Rule 1: Pokémon Death

A Pokémon that faints is considered dead and can no longer be used. Revival items cannot be used in battle. If a battle ends with no forfeiture, all Pokémon with 0 HP are marked dead. If a battle ends in a forfeit, all Pokémon with 0 HP before the forfeit are marked dead. Pokémon marked as dead have \$05 written to their catch rate to permanently mark them. Even if they are traded back and forth, dead Pokémon remain marked while in nuzlocke mode.

Medicinal items will not work on Pokémon marked as dead, nor will Softboiled. Party healing (Mom, Pokémon Center, blacking out, etc.) makes a dead Pokémon effectively useless. 真 PokéNavi™

Item Clause: Items may not be used in battle.

Freeze Clause: A trainer's team can only have one Pokémon frozen at a time. When a Pokémon is frozen and another Pokémon on the same team is targeted with a move that can cause the Freeze condition, the chance if that move inflicting Freeze is reduced to 0%.

Sleep Clause: A trainer's team can only have one Pokémon asleep at a time. When a Pokémon is asleep and another Pokémon on the same team is targeted with a move that induces the Sleep condition, that move will have no effect. The move Rest will still cause its user to fall asleep regardless of this clause. A Pokémon that has fallen asleep due to using Rest still counts towards this clause's limit of one sleeping Pokémon per team.

Hyper Beam Clause: The move Hyper Beam does not need to recharge if it knocks out the opposing Pokémon.

Trapping Move Clause: Trainers have a counter that starts at 0. Successfully using trapping moves (Wrap, Clamp, Fire Spin, or Bind) increments the counter by 1. Selecting a trapping move after the counter becomes 2 causes the move to have negative priority and go 2nd in each round. Switching or using a non-trapping move resets the counter to 0.

20

Freeze Clause: A trainer's team can only have one Pokémon frozen at a time. When a Pokémon is frozen and another Pokémon on the same team is targeted with a move that can cause the Freeze condition, the chance if that move inflicting Freeze is reduced to 0%.

Extra Bag Pocket

The bag now supports an additional item list for an extra 20 slots of space. **Press START while in the bag menu** to hot-swap the item list that populates the active bag. This also works in battle or when depositing items into the PC.

In general, the non-active item list gets recognized by the game's systems. For example, you can enter the Cinnabar Gym even if the Secret Key is in the non-active bag space. For certain unique systems, like Pokéon Stadium compatibility, only the active bag list is detected.

One-Button HM Usage

You must still have the correct badge and move on one of your Pokéon to use a HM in this way. **Press START while in the bag menu** to hot-swap the item list that populates the active bag. This also works in battle or when depositing items into the PC.

HMO1 - Press SELECT when facing a shrub or grass tile to use CUT.

HMO3 - Press SELECT when facing a shore to use SURF.

HMO5 - Press SELECT in a dark area to light it with FLASH.

HMO4 - Press SELECT while facing a boulder to activate STRENGTH. Your Pokéon's cry plays and the screen flashes. **22**

45

Changes to Item Locations

- Additional hidden potion in Uridian city

Forfeit Trainer Battles

You can now forfeit a trainer battle to force yourself to black out. This can be useful for escaping in-battle softlock scenarios. On the main battle menu, place the cursor over **RUN**. **While holding the SELECT button, press the A button.** You will be asked to confirm your decision. Choose YES to forfeit or NO to cancel.

Shiny Pokémons and Viewing a Shiny Palette

Pokémon can be shiny based on the same DV criteria for Gen-2 Pokémon games. This means caught shiny Pokémons can be transferred between Gen-1 and Gen-2 games and still remain shiny. An indicator of three sparkles will appear by a Pokémon's name in battle and the status menu if it is shiny. The shiny Pokémon will also have a palette swap color if playing as a Game Boy Color or Super Game Boy game.

25

PRO-TIPS

Buying a Magikarp from a shady figure might not be such a bad investment.

Stock-Up on Items

Enemy trainers are more aggressive about attacking, so your team incurs more damage over time. Be sure to purchase a reasonable stock of healing items to counter the increased attrition.

Pokémon that are given to you by NPCs have above-average DVs. This applies whether it is a gift, in-game trade, or a purchase. This means that prize pokémon from the game corner will always have good stats. And buying a Magikarp from a shady figure might not be such a bad investment.

Stock-Up on Items

Enemy trainers are more aggressive about attacking, so your team incurs more damage over time. Be sure to purchase a reasonable stock of healing items to counter the increased attrition.

The Catch-Up Booster bonus compounds with other 1.5x EXP bonuses in the game. With this in mind, activate level-scaling and do trainer rematches with a traded Pokémon to gain loads of EXP.

Here is an alternative to grinding out battles in the post-game. Catch some Pokémon. Sell them to the game corner chief. Buy rare candies and vitamins with the proceeds. Take note that vitamins are uncapped in the post-game for Pokémons above level 30. Use your purchases to train your team without battling.

42

The Catch-Up Booster bonus compounds with other 1.5x EXP bonuses in the game. With this in mind, activate level-scaling and do trainer rematches with a traded Pokémon to gain loads of EXP.

Training in Post-Game Without Battling

Here is an alternative to grinding out battles in the post-game. Catch some Pokémon. Sell them to the game corner chief. Buy rare candies and vitamins with the proceeds. Take note that vitamins are uncapped in the post-game for Pokémons above level 30. Use your purchases to train your team without battling.

No. 148

A mystical POKÉMON

that exudes a gentle aura.

It's Pokédex entry. The Pokédex entry will display the Pokémon with its shiny color.

25

PRO-TIPS

Pokémon that are given to you by NPCs have above-average DVs. This applies whether it is a gift, in-game trade, or a purchase. This means that prize pokémon from the game corner will always have good stats. And buying a Magikarp from a shady figure might not be such a bad investment.

Stock-Up on Items

Enemy trainers are more aggressive about attacking, so your team incurs more damage over time. Be sure to purchase a reasonable stock of healing items to counter the increased attrition.

真 PokéNavi™

Bill's Secret Garden

It is possible to get behind Bill's house if you show him a "new species" of Pokémon. The area behind this house will let you encounter rare Pokémon at level 5 such as the starters. These Pokémon have a 1-in-128 chance to be shiny.

The Scourge of MissingNo.

MissingNo. can be activated after viewing your completed Pokédex diploma in the Celadon Camfreak building. Talk to the old man in Viridian and watch his catching tutorial. Then start surfing up and down the east Cinnabar shore. Win or lose, you have to reactivate the battle via the old man. If you win the battle, the item in your 6th bag slot will be multiplied.

The Scourge of MissingNo. Part II

An even harder MissingNo. battle can be challenged. It works the same as previous, except the player should start surfing up and down the east Seafloor shore. If you win the battle, the item in your 6th bag slot will be multiplied and a special flair will be added to your diploma.

Owned Pokémon Audio Cue

On the main battle menu, place the cursor over an option in the left column (FIGHT or ITEM). Press the SELECT button. The active enemy Pokémon will play its cry if that species is registered as Owned in your Pokédex.

New Game Plus

To initiate this feature, you must have an existing non-corrupt game save on-file. You must also have beaten the Elite-4 in the on-column (FIGHT or ITEM). Press and hold SELECT while choosing the NEW GAME option. A jingle will play to indicate NC+ has activated and the SELECT button can now be released.

Preserves ONLY the following (your current party will be lost):

- Boxed Pokémon
- Play clock
- Pokédex seen/owned registry
- Hall of Fame (somewhat experimental)
- Option screen selections
- Trainer ID (affects Pokémon obedience)
- Wild Pokémon randomizer seed

The player can choose whether or not to generate a new Trainer ID when selecting New Game Plus.

GAMEPLAY-RELATED FEATURES

Temporary Field Move Slots

When teaching a Pokémon a field move outside of battle, such as with a HM, this feature becomes apparent. You will be asked if you would like to teach it as a temporary field move. If so, it will be learned into a special field move slot that is separate from the normal list of four moves. Such a temporary move cannot be used in battle, but it can be used in the overworld as normal.

Each Pokémon on your team can have one temporary field move at a time. Having one will display it on the status screen above the Pokémon's other moves. A temporary field move cannot be overwritten with another field move. But it will be erased if its owning Pokémon leaves the party (such as by being deposited in the PC).

If all four of a Pokémon's regular moves are field moves, its temporary field move cannot be menu-selected. But if a fifth field move in the temporary slot is a HM, it can still be activated via One-Button HM Usage.

Teaching a TM as a field move will not consume the TM.

Reworked Fishing

The locations of the Good Rod and the Super Rod have been swapped, and Route 12 has been altered to make its Fishing Guru accessible as soon as you reach Launder Town.

All rods now randomly add 0 to 7 levels to anything hooked.

The **Old Rod** can fish up two kinds of Pokémons depending on the current map from this list: Magikarp, Goldeen, and Poliwag. Additionally, when using the Old Rod, press and **hold B** within about 1 second to always hook a Magikarp.

The **Good Rod** can fish up three or four kinds of Pokémons depending on the current map from this list: Magikarp, Goldeen, Krabby, Goldeen, Psyduck, Shelder, Poliwag, Horsea, Krabby, Goldeen, Psyduck, Shelder, and Tentacool.

Improved Itemfinder Function

If an item is detected, it will play 1 to 3 chimes depending on how close it is (more chimes means closer to the item). Lines will point in the direction of the item and flash with the chimes. If the player is right on top of the item, no lines will show and the chime will play four times. If the **SELECT** button is held while selecting to USE the Itemfinder, then the original Itemfinder function is used.

All rods now randomly add 0 to 7 levels to anything hooked.

The **Old Rod** can fish up two kinds of Pokémons depending on the current map from this list: Magikarp, Goldeen, and Poliwag. Additionally, when using the Old Rod, press and **hold B** within about 1 second to always hook a Magikarp.

The **Good Rod** can fish up three or four kinds of Pokémons depending on the current map from this list: Magikarp, Goldeen, Krabby, Goldeen, Psyduck, Shelder, Poliwag, Horsea, Krabby, Goldeen, Psyduck, Shelder, and Tentacool.

Improved Itemfinder Function

If an item is detected, it will play 1 to 3 chimes depending on how close it is (more chimes means closer to the item). Lines will point in the direction of the item and flash with the chimes. If the player is right on top of the item, no lines will show and the chime will play four times. If the **SELECT** button is held while selecting to USE the Itemfinder, then the original Itemfinder function is used.

29

Bulk Coin Seller

One of the Rocket grunts walking around the top left corner of Celadon City will now sell you 1000 coins at a time.

Selling Pokémon

Find the house with the game corner CHIEF in Celadon City. Talk to him after beating the Elite-4 straights. He will offer to buy the Pokémon in your team's first slot. The value is based on whether it is shiny or not.

Mr. Fuji and the M.Gene
Put Meutwo at the head of your party and talk to Mr. Fuji to get the new M.Gene consumable item. The M.Gene can be used on a Pokémon out of battle in order to re-randomize its DVs with above-average values. This constitutes a scrambling of DNA, so it may affect that Pokémon's sex and shiny status.

Reworked Daycare

The daycare has a PC added for the player's convenience.

Pokémon with HM moves are now allowed in the daycare. The daycare also lets you select moves to forget (if any) upon retrieving your Pokémon. After trying to learn all the moves it can up to its new level, it will try to evolve if applicable. After evolving, it tries to learn any other moves between its evolution threshold level and its new level. If it can evolve again by level, it will try to do so and once more try to learn any moves it may have missed.

37

The downside of not gaining StatEXP in the daycare still remains as a tradeoff. Consider using the daycare as a way to outsource some grinding while you go focus on other things.

Reworked Daycare

The daycare has a PC added for the player's convenience.

Pokémon with HM moves are now allowed in the daycare. The daycare also lets you select moves to forget (if any) upon retrieving your Pokémon. After trying to learn all the moves it can up to its new level, it will try to evolve if applicable. After evolving, it tries to learn any other moves between its evolution threshold level and its new level. If it can evolve again by level, it will try to do so and once more try to learn any moves it may have missed.

The daycare experience gain has been recalibrated. It no longer gives 1 EXP per step. Instead, it falsifies the act of farming wild encounters against a Pokémon with a base EXP value of 56. The falsified encounter starts at level 5, and it increases 5 more levels per badge obtained. With 8 badges, using the daycare is essentially a faster way of farming level 45 basic Pokémon.

SS Anne Tournament

You can return to the SS Anne after beating the Elite-4. Find the Gym Guy hanging out in the kitchen. He is organizing a little tournament with the following rules:

- 1 - Seven matches to win.
- 2 - Must use a team of exactly three Pokémon.
- 3 - Your Pokémon are healed after every match.
- 4 - Enemy levels are scaled to your strongest party Pokémon.
- 5 - You must have an open item slot to claim your prize.
- 6 - Any trainer can appear with any three Pokémon (excluding Mewtwo and Meow).
- 7 - No breaks allowed in-between battles.

Winning the tournament rewards you with a Master Ball!!

Uncapped Vitamins
After beating the Elite-4, vitamins have no limit placed upon them when used on Pokémon greater than level 30.

Catch-Up EXP Booster

Talk to the aide in the Celadon Diner to toggle this feature. While active, EXP gained is boosted if the active Pokémon's level is lower than that of the fainted enemy. The boost is 1.5 multiplied by an additional 1.5 for every 3 levels of difference. For example, a level difference of 9 results in an EXP multiplier of $(1.5)^4 = 5.0625$. Use this feature to help you train-up new team members in the mid-to-late game.

Get a Free Paras

Go to the small house on Route 2 just below the exit of Diglett's Cave. The Aide NPC inside the house will now gift you a Paras.
